

Dr. David S. Alleman

Has been practicing dentistry for 32 years since his graduation from the University of the Pacific in 1978. The first three were in the US Navy and the last 29 in Utah. In 1995 he started studying adhesive dentistry with Dr. Ray Bertolotti. In 1999 he started studying with Dr. John Kois. These two mentors guided him through a 10 year/10,000 hour review of the literature on which advanced adhesive (Biomimetic) dentistry is based. Other mentors and collaborators are Dr. Gary Unterbrink, Dr. Didier Dietschi, Dr. Pascal Magne and Dr. Geoff Knight. He is currently partnering with Dr. Simone Deliperi from Sardinia, Italy to teach these techniques to practicing dentists at his educational facility in Salt Lake City, Utah. He is a member of the Academy of Operative Dentistry & The International Association for Dental Research. He has published articles on advanced adhesive techniques that focus on reducing stress, increasing long-term bond durability and tooth conservation. He currently mentors over 250 dentists nationwide in his practice based research group.

"There is no Aesthetics without Function & Gingival Health" S. Deliperi, 2001

"Get Bonded, Stay Bonded" D. Alleman, 2003

Air travel and accommodations are the responsibility of each participant.

Recommended Hotels:

Hotel Nautilus,

THotel,

Hotel Regina Margherita

Recommended B&Bs:

"La locanda dei buoni e dei cattivi"

"Aldebaran"

Transportation will be provided for participants to and from their hotels to the Sardinia Dental Training Center

Tuition in U. S. Dollars:

Utah Course \$1,500

Sardinia Course \$6,000

***** Course Specials! *****

I: Register by March 1st: 10% discount

II: Utah + Sardinia: 20% discount

(Specials cannot be combined.)

Little America Hotel

Salt Lake City, Utah

=

Piazza Unione Sarda 39

Cagliari, Sardinia

For questions on traveling to both Sardinia and Utah, please, contact Cindy @ 360-377-4700

*The power of Biomimemetic Dentistry:
maximum tooth preservation, function and
aesthetics via stress-reduced restorations*

June 1-2, 2018:
*conference and workshop
Salt Lake City, Utah*

April 16-19, 2018:
*live patient demo and hands-on courses
Cagliari, Sardinia-Italy*

Dr. Alleman and Deliperi have refined and developed biomimetic protocols for 15 years. Their protocols have been published in peer-reviewed journals since 2002.

They have seen a dramatic improvement in their patients' dental health by preserving the remaining sound tooth structure and avoiding either root canal or tooth capping with conventional crowns.

Dr. Simone Deliperi

Is a national and international lecturer; he has been providing continuing education and hands-on courses on aesthetic and biomimetic dentistry both in Europe and the USA for the last 12 years; he has been publishing in peer-reviewed journals since 2002. He is an adjunct assistant professor at Tufts University School of Dental Medicine. He maintains a private practice and operates a teaching center (Sardinia Dental Teaching Center - SDTC) in Cagliari, Sardinia - Italy which is part of an international network including The Alleman-Deliperi Centers (ADC) for Biomimetic Dentistry South Jordan, Utah USA & Cagliari, Sardinia - Italy. The ADC are considered the milestone for the foundation of the Academy of Biomimetic Dentistry (ABD).

"The More Structurally Compromised is the tooth, The More Conservative we need to be!" S. Deliperi, 2010

"Biomimetic Dentistry is not just using a biomimetic material, but using that material according to a validated biomimetic protocol" S. Deliperi, 2013

June 1-2, 2018:
conference and workshop
Salt Lake City

Day I

Fundamentals of Biomimetic Restorative Dentistry

1. Structural Analysis
 2. Increasing Bond strength
 3. Decreasing Polymerization and Functional Stresses
 4. The Biomimetic Restorative Dental Paradigm.
- By decreasing stresses of polymerization and occlusion, dental bonds are maximized and preserved. By maintaining peripheral seals, recurrent caries and fractures are eliminated.

We will review each area and present 27 key scientific facts that have been established from the scientific literature. These facts are the foundation of the Alleman-Deliperi protocols which biomimetic restorative dentistry is founded on.

Day II

From science to clinical practice: clinical protocols on biomimetic restorative dentistry

1. Stress-reduced direct composite (SRDC) restorations
2. Fiber lay down protocols
3. The bio-base
4. Stress-reduced semi-direct composite (SRSC) restorations
5. Layering strategies for anterior SRDC restorations
6. Full-mouth rehabilitation

April 16-19, 2018:
live patient demo and hands-on courses
Cagliari, Sardinia Italy

Day I Monday

Anterior Teeth

Stress-Reduced Direct Composite (SRDC)

Day II Tuesday

Posterior Vital Teeth

Stress-reduced direct composite restorations (SRDC) and fiber lay down protocols for structurally compromised teeth

Day III Wednesday

Posterior Devital Teeth

Stress-reduced semidirect composite (SRSC) restorations for structurally compromised discolored teeth

Day IV Thursday

The Biomimetic Full-Mouth Rehabilitation

Morning:

TMJ, TMD and Full-Mouth Rehabilitation via SRDC and SRSD restorations

Bonus: hands-on course and workshop on dental photography

Accreditation course on Biomimetic Dentistry

Testimonials:

1) Dr. Deliperi's course really "upped my game" in biomimetic dentistry. His lectures filled in some gaps and helped me to better understand the profound value patients get when biomimetic protocols are properly used to restore their teeth. Dr. Deliperi is an excellent host and teacher and his passion comes through in all his lectures, hands-on and his over-the-shoulder teaching. The big screen over-the-shoulder is even better than viewing with loupes. Studying with like-minded dentists from around the world re-invigorated my professional life.

Dr. Peggy Ames, Long Island, NY

2) "Energize your passion for dentistry from a world class mentor, you owe it to yourself and patients to practice with renewed passion and purpose."

Dr. Jim Erpenbach, Knoxville, TN

3) My experience attending the seminar conducted by Dr. Deliperi in Sardinia was career changing. I feel that the hands on, the lectures and patient demonstrations were all superlative. The literature review by Dr. Alleman was also very informative. I would highly recommend this course to anyone who wants to improve their patient skills and develop a greater understanding of the rationale of Biomimetic treatment based upon the latest science. It is the best seminar I have ever attended in my career.

Dr. Saul Pressner, Manhattan, NY

4) "This course will give you a great understanding of what biomimetic dentistry is all about. The excellent live patient demonstrations by Dr. Simone shows you what is possible in the world of dentistry today. The hands-on reinforces the knowledge and gives you the confidence to be able to replicate what is being taught. An excellent and intense course"

Dr. Edwin Tng, Singapore

A unique experience which pushes you to the next level. You will never forget it.
